DEC 2020 Newsletter

MATERIAL PRICING: The commodity lumber markets moved higher this past week as buyers covered sold projects and boosted fall inventories. SPF dimensional saw solid gains as mills continue to build extended order files. Hem Fir and Doug Fir dimension markets firmed up with limited supplies in some widths and grades. SYP dimension traded on both sides of last week's numbers depending on the widths. Panel markets saw SYP plywood moving higher with order files into mid December. Fir plywood slipped lower as mills search for a trading level. OSB producers dropped pricing in an attempt to rebuild order files. The North Central region producers were slower to drop prices due to limited production. As always, keep your bids current.

NEW FROM ANDERSEN—Wouldn't it be nice to have more blind options for your patio door customers? Andersen is introducing a slate grey and white blinds for their patio doors in the A Series. This is the first time the A Series has had a blind option, and it is available with any interior finish and exterior color. There may be some limitations for sizing, but the standard sizes/finishes will have the blind option.

COVID 19 seems to be hitting very hard in our area right now. Due to the Tier III restrictions we have made some adjustments here at Carver Lumber. To help all of us stay safe, please call ahead for an appointment with the showroom or drafting, or to place your order for stock goods. This will reduce your wait time and your exposure to people here at Carver. We look forward to serving you in the best and safest way possible, and thank you for shopping with Carver Lumber!
